VASUNDHARA PATTNAYAK

Hyderabad,India | 09226330940 | pattnayakvasundhara@gmail.com | github.com/CocoCodes1518

PROFESSIONAL SUMMARY

Recent Full Stack Developer graduate with demonstrated experience in full-stack development, AI, and cloud computing on AWS. Proficient in designing, developing, and deploying scalable applications. Eager to contribute technical skills and a passion for innovation to challenging development projects.

PROFESSIONAL EXPERIENCE

GyaanGeeks **Lucknow,India**

Full Stack Developer Intern *Feb 2026 – May 2026*

- Successfully engineered and delivered three responsive, production-ready websites, including an enterprise AI automation platform (Quentova.com) and an e-commerce platform (Shoptiq), significantly enhancing client digital presence and functionality.
- Developed and integrated robust end-to-end features across front-end and back-end systems, leveraging REST APIs and MVC architecture to ensure scalable and maintainable applications.
- Optimized client-facing websites by strategically implementing Server-Side Rendering (SSR), significantly improving page load performance and boosting SEO.
- Collaborated cross-functionally with design and digital marketing teams, successfully translating complex client requirements and design mockups into highly functional and intuitive web experiences.
- Operated within an agile development framework, delivering solutions in iterative cycles while receiving organizational mentorship from agency founders and academic supervision, culminating in comprehensive project documentation.

Deloitte **Remote**

Virtual Intern *May 2025 – May 2025*

- Completed a simulated data analytics consulting engagement, expertly navigating and resolving complex, real-world client challenges to formulate strategic, data-driven solutions.
- Performed in-depth data analysis on extensive datasets, subsequently designing and deploying interactive dashboards using Tableau/Excel to translate complex findings into clear, actionable insights, empowering client decision-making.
- Composed a comprehensive report for non-technical stakeholders, effectively distilling complex analytical findings into clear, concise, and actionable business recommendations that informed strategic decision-making.

CodeAlpha **Remote**

Virtual Intern *Sept2025 – Sep2025*

- Developed and implemented multiple web development projects, leveraging HTML, CSS, and JavaScript to create functional and engaging user interfaces.
- Engineered a personal portfolio website and an interactive music player application, prioritizing clean, maintainable code and robust functionality.
- Utilized GitHub for version control and collaborative project management, ensuring code integrity and facilitating seamless progress tracking.
- Presented project outputs to mentors, effectively articulating technical decisions and integrating feedback for iterative improvements.

Projects –

1. Interactive 3D Portfolio

Developed an innovative, scroll-driven 3D portfolio using TypeScript, React, Three.js, and React Three Fiber, featuring a custom cartoon-style character and interactive elements (clickable stickers, horizontal slider) to dynamically present projects, achievements, education, and experience.

Customized an open-source 3D résumé framework, integrating a unique character model, content, and light color theme, while maintaining all project case studies in easily editable Markdown data files for efficient updates and scalability.

Integrated a distinctive "Why not hire me?" section to offer a transparent and memorable perspective on personal work methodology and professional ethos, enhancing personal branding.

Utilized advanced rendering and animation libraries, including @react-three/postprocessing (depth of field, bloom, SMAA anti-aliasing) and Framer Motion, to enhance visual fidelity and user engagement.

Architected and deployed a high-performance static single-page application without a backend using Vite for optimized build processes, achieving cost-efficient hosting on [GitHub Pages/Vercel].

2. Roam: Cafe Finder

Launched a dynamic web application that automatically discovers and displays nearby cafes using real-time map data from [Google Maps Platform / OpenStreetMap], enhancing user convenience by eliminating manual searches.

Designed and implemented a clean, aesthetic, and responsive user interface with HTML5 and CSS3 that ensures optimal viewing and functionality across both mobile and desktop devices.

Integrated Leaflet.js / Google Maps JavaScript API to render interactive maps, displaying comprehensive cafe information including locations, ratings, and opening hours fetched via the Browser Geolocation API and Fetch API.

Achieved rapid deployment in under 24 hours while maintaining a zero-cost operational model by leveraging free-tier APIs and static hosting solutions.

3. CloudOrder: Cloud-Based Order Platform

Architected and deployed a cloud-hosted order management platform, featuring a static frontend served via GitHub Pages and a robust serverless backend powered by Cloudflare Workers.

Established a comprehensive CI/CD pipeline using GitHub Actions to automate continuous builds and deployments on every push to the main branch, ensuring rapid and consistent updates.

Engineered a highly cost-efficient solution by designing the entire architecture around free-tier cloud services, resulting in zero operational infrastructure costs.

Implemented core functionalities, including order creation, order status tracking, and an administrative view, through well-defined REST API endpoints, utilizing Cloudflare KV for durable and efficient storage.

EDUCATION

NIMS University **Jaipur,India**
BTech Computer Science June 2026

Kendriya Vidhyalaya Southern Command **Pune,India**
Senior Secondary Year 12 May 2021

TECHNICAL SKILLS

AWS • React • JavaScript • TypeScript • Python • Node • AI/ML • Git • Terraform • UI/UX • SVM • MERN
